ABOUT

Detail-oriented professional transitioning into Business Intelligence and Data Science, with a background in business management, research, and customer relations. Passionate about using data to solve real-world problems, uncover insights, and support strategic decisions. Actively building hands-on skills in Python, SQL, data visualization, and analytics tools — seeking a co-op or internship opportunity to apply and grow these capabilities in a real business environment.

EXPERIENCE

Maintenance Assistant • **Lions Gate Maintenance**

2023 – Present

- Managed resident requests and facility operations using structured scheduling and operational records
- Recorded and tracked inspection data to help identify maintenance needs and support decision-making
- Coordinated contractor logistics, improving response times and service quality tracking

Customer Service Admin Executive • **E Factor Network**

2018 – 2022

- Analyzed customer data to identify growth opportunities, contributing to revenue increase and platform enrollment
- Produced reports and managed financial documentation to support executive decision-making
- Translated customer insights into targeted service recommendations

Research Analyst Associate • **University of Celaya**

2011 – 2018

- Conducted marketing research and database analysis, producing reports to support business decisions
- Coordinated executive calendars, meetings, and cross-departmental communications
